Notes

- Love the design of heading for mockup A, historical setting for mockup B, plot overview for mockup A
- Try maybe leaving more breathing room between sections (picture?)\
- Wish the heading or title of the page could be bolder and catch audience eyes
- Images in between the texts could be a good choice to elaborate the story.
 - kind of worrying about the pics being too big for the mobile view
- Love the typefaces, displaying speed and motion
- Definitely delete the spoilers from the plot. Wikipedia is not doing a great job.
- Love the text amount. Just about right.
- Maybe another navigation bar at the bottom for readers convenience?
- The most important thing: Go With The Flow!!! Porco Rosso will lead you the way. 😊
